

Enmac Ensured Safety eliminates the risk of falling

When handling chemicals it is important to ensure occupational safety but also minimize risks for the environment, such as chemical spillage. The Enmac Ensured Safety product family offers reliable Finnish solutions for safe working for example at plants or in areas where vehicles or trains are loaded and unloaded. Enmac provides CE approved fall protection structures and loading arms as a turnkey solution.

Customizable fall protection structures

- Suitable for spaces of different heights and of a variety of sites
- Fulfill the dimensional and strength requirements laid down in the working platform standard
- Help to improve your safety but also efficiency

Ergonomic loading arms

- Enable the safe loading or unloading of vehicles or trains to be carried out
- Suitable for a variety of chemicals and fuels
- Always dimensioned to work with our fall protection structures

“Occupational safety is a very important issue at Advario Finland and our goal is zero accidents. Thanks to Enmac’s fall protection structures and loading arms, our loading and unloading sites for tall oil now meet Advario Finland’s occupational safety and ergonomic requirements.”

- Mr. Olli Manninen, Advario Finland Oy
