

SAFETY STRUCTURE FOR LIQUID CONTAINERS

This safety structure is used on top of 20' liquid containers. It is lifted onto the container using a forklift or crane. This safety structure is designed to improve the occupational safety when working at height.

This safety structure can be customized for intended use. The usability can be improved with additional accessories such as a canopy and ladders. Due to the fixed corners multiple safety structures can be stored on top of each other.

The safety structure is a CE marked product according to EU directive of machinery 2006/42/EC. It is manufactured from sturdy structural steel and is designed according to "Safety of machinery, Permanent means of access to machinery" EN ISO 14122-3:2016 standard. The versions fulfilling EX requirements are available upon request.
